INTERNATIONAL

INTERNATIONAL BODYGUARD & SECURITY SERVICE

WELCOME

The PSA International - International Bodyguard and Security Service™ is a member of the PSA International Company Group™. The previous name was TCCS-Worldwide-IBSS.

The PSA International Company Group™ is offer one of the best cutting edge of Personal Protection & Security Service and Special Defence and Security Training Provider for several military and government agencies and UN but it is working in the private security industry too in worldwide.

Also member of the group the PSA Security & Defence Technology Research and Development Center™ too. The Centre purpose to develop of the special designed special military and defence equipments and safety technology systems, what primarily will be use of the military and law enforcement agencies in special areas and war zones in worldwide. Such as: Drone technology, jammer, drone hunter, cryptographic equipments, secret communication systems etc.

PSA International - IBSS™ is private, independent executive security service was established with the purpose to provide the highest level of professional protective services for you as well as in priority areas of society.

The founder and the management are fully committed to the cause and worked for a long time as highly trained, internationally recognized security and anti-terrorist professionals, experts, consultants, and trainers.

The PSA International - IBSS™ is specialized personal protection and special security services and support in high risk zones and hostile areas or dangerous seas. Our scope covers also Close Protection/Bodyguard services for high profile media personalities, musician artists, professional athletes as well as, business people, princes and corporate executives.

We base our activities on the decades of professional experience our staff and experts have gained during their active duty services.

PSA International - IBSS™ is committed to make you feel that your family, your clients, employees as well as your valuables and yourself are in safety wherever you live in the world.

Our company is an enterprise which seeks customer satisfaction through highest-standard services, client-oriented and performance-based policies of our mission.

We provide services that are only carried out according to current and relevant national and international laws and regulations.

Our success and reputation has grown up from understanding and fulfilling our Client's exclusive requirements.

PSA International - IBSS™ is an innovative security company focusing on quality is not quantity as well as stability and flexibility.

The company's operation is characterized by four words:

- Expertise
- Security
- Reliability
- Discretion

INTERNATIONAL PROTECTIVE SERVICE

One of the factors of the harmonized, happy life is the feeling of safety. Unfortunately nowadays, in this running, changing world you have to close the door and use modern alarm systems, because you and your values could be attacked at any time by aggressors.

It isn't a secret: the more successful you are (because of your property, reputation, beauty or influence), the bigger goal you are in your enemies' and in the envious or fanatic people's view, so you would like to protect more and more yourself, your family, your values and your travels.

The principals would like more and more high-level educated security experts and professional security services.

To this problem the PSA International - IBSS™ offers to you and your firm as well as employees a solution, collaborating with our partners.

The PSA International - IBSS™ offers its professional security services goal-oriented and systematical, by safety experts and specialists, who have high-level education with professional diplomas and international or NATO qualifications as well, and it insure You, the life and the human dignity of Your family and Your loved ones, the safety of Your employees/customers, and the undisturbed of Your conduct, travels and programs.

Note: In Europe the European Centre of PSA-IBSS is known as European Security and Defence Agency™ -ESDA™. The ESDA™ is a full authority member of PSA International Group™.

The ESDA offers a special armed protective and complex security solution in high risk and highlighted facilities and events protection like the Embassy of the Isreal, furthermore offers protection to religious leaders and events, politicians, diplomats and high profile VIP persons in Europe and with together the PSA-IBSS centre outside Europe as well. Our all services of course we doing independently of ethnic view and religious affiliation.

Personal Protection

The PSA International - IBSS™ specializes in Personal Protection services for high profile celebrities, television personalities, musical artists, professional athletes, businessmen, princes, diplomats, corporate executives and their family member and Your loved ones, employees/customers complex protection.

The PSA International - IBSS™ offer one of the best cutting edge of Personal Protection Service.

The PSA International - IBSS™ can ensure the security of important executives while they travel in unfamiliar locations or high-risk environments, or while they attend events where they may attract unwanted attention. Our Specialists can (individually or as part of a security detail) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Our firm can provide the protection you need locally, regionally, nationally or internationally too.

Our clients can have confidence in their protection team's ability to handle their protection detail from start to finish.

We offering our personal protection services on the follower five professional area:

1.) Celebrity/VIP Bodyguard	2.) Business Bodyguard	3.) Diplomatic Security/Bodyguard
4.) Kid Guard/Child Bodyguard	5.) Female Bodyguard	

Celebrity/Star Bodyguard

The public fascination with high profile celebrities and public figures means inevitable intrusions into privacy. Between the paparazzi and obsessive fans with cell phone cameras; cases of direct threats from criminals, kidnappers and extortionists are on the rise.

The PSA International - IBSS™ provides absolute discretion and help protect famous persons, singers, movie stars and artists, permanently or periodically, on premiers, filming, concert tours or anything different events, discreetly or demonstratively; or/and help them and their personnel, train and bodyguards, who haven't got any area knowledge; organizing and insuring their arrival, in whole Europe, US and worldwide.

We can provide a Personal Protection Team for both short term assignments, to protect a celebrity's privacy while at a public venue, and long term assignments to provide the ultimate security for a celebrity's personal and professional life.

Our Specialists can (individually or as part of a security detail) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Business Bodyguard/Personal Assistant

A corporate executive and businessmen or bankers should be able to focus on his or her job.

That's why we make their personal safety our duty. Our Personal Protection Specialists are skilled in dynamically facilitating all executive travel activities. We make sure that all aspects of the client's protection and security needs are taken care of, allowing corporate executives to maximize their time of work.

The PSA International - IBSS™ can ensure the security of important executives while they travel in unfamiliar locations or high-risk environments, as well as while they attend business negotiations, tenders and other events where they may attract unwanted attention.

The PSA International - IBSS's management is well aware that in today's business life information is power and therefore our own Specialist Team prepared and can ensure the protection of important business "secret" negotiations not only for personal safety point of view, but information and data security point of view as well. - so that we can escape from intercepting confidential "sensitive" informations and monitoring equipment by spy devices. - and it should not cause you surprises, discomforts and financial losses.

This service is filled by the bodyguards of the PSA International - IBSS, who are trained to handle the problems that are known in the business sector. Over the knowledge of security and safety, they got training to attend organizing, business and the diplomatic protocol as well as personal assistant tasks as well.

Our Specialists can (individually or as part of a security detail) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Diplomatic Security/Bodyguard

Complex security and protection of diplomatic motorcades, delegations, diplomats, politicians and their family members, independently of ethnic view and religious affiliation. The organizing is based exclusively on professional bases, keeping the diplomatic protocol and the various national habits.

Beyond the defense skills and the diplomatic protocol our specialists are highly trained in providing armed and diplomatic buildings, embassies, consulates - the protection of the organization of complex events and controlling, entry and exit regulation.

Our operational team is trained to the highest standards by our management team of uniquely qualified personal protection specialists. Our team is trained in the pro-active and interactive facilitators with an attention to ensures all aspects of the principal's protection. Our Specialists have unique real-life experience within special units of the police service, as well as military and other security environments.

At the PSA International - IBSS™ we appreciate the parameters of a protection assignment at all levels of threat and specific environments. Our personnel are trained to work in areas ranging from those requiring unobtrusive low visibility to international high threat/risk arenas.

Our team are experienced in hostile and violent environments where activists from many factions of economic, political and religious backgrounds pose an on-going threat. Each of us comprehend the enormous amount of reliance, trust and confidence placed upon us, and is diligent in protecting the confidential nature of the association.

Our Specialists can (individually or as part of a security detail) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Kid Guard/Child Bodyguard

Insuring and observation of children, who need parental control, and security going with them to nursery school, to school or to anything different programs, occupations, from their very early childhood.

This field of knowledge is starting to become more accepted due to the global increase of kidnappings and abductions. Let us not to forget, that the VIP's family members are living unknowingly in the same threat as the target person. The attacker or hit-man will see the high level of protection, which the target person is receiving, so he might try to find a way to get a chance, where he can achieve his goal with the lesser amount of energy. The simplest way is through the target person's family members are the children. Let us just think about it, every normal person would do anything for their children, the target person can be blackmailed and will be vulnerable this way.

That is why we say that the protection of children is a priority in personal protection, because a child is honest and tells the truth and a child's soul is much more vulnerable. So in high risk situations, it is much more difficult to get it in the line of defence or into conspiracy ordinations due to his way of life and age.

The security of a very minor children is fulfilled by bodyguards, who got a training to attendance of children in a way of pedagogy, babysitting and first-aid, too, over the security knowledge.

Our Specialists can (individually or as part of a security detail) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Female Bodyguard

In recent years, there has been increasing demand for the professional female bodyguards in worldwide.

Outstanding clients abroad now understand perfectly well that female bodyguards are more universal than men. Example Sharon Stone employs female bodyguards. Indeed, female bodyguards can accompany their female clients in fitting-rooms in a boutique, in beauty shops or ladies' room in a restaurant.

A client may choose to have a Female Personal Protection Specialist either based on gender preferences or because a female operative can appear to be nothing more than a personal assistant or nanny.

It is known that women oftener resort to "peace talks" than force. Women are seldom treated as a source of menace, and this fact helps female bodyguards act promptly and effectively in case of emergency. Because of this, a Female Protection Specialist can be a valuable and discreet asset as they provide a more low-profile protection.

The PSA International - IBSS™ can provide trained and experienced female protection specialists anywhere in the world, based on the client's needs. Our female protection specialists undergo the same rigorous screening and training as their male counterparts, so our clients can have confidence that their specialist is fully qualified to keep them safe.

The clients for female bodyguards are very special, all belonging to business and show business high society circles, so the bodyguards must be really up to snuff both inside and out, with being both physically and mentally capable the ultimate goal.

Our female bodyguard can (individually or as part of a security team) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Victim and Witness Protection Services

By right of authority or indirect charges, the victim and witness protection service of the PSA Special Service is performed by the agents of PSA International - IBSS™ who are special trained for this branch area. The persons, who get in this program, go through in a system with many levels, by right of the endangeredness degree.

The PSA handles the datas of the persons participating in this program with high-level secrecy and encryption, and it accepts and fulfils this service only as a complex protection.

Subject to the character of the ranging, the agents of the PSA International - IBSS™ can fulfil this service periodically or permanently, by the side of the protected witness or in the case of extended security by the side of the family members, with their written approval

The base condition of the entrance in the program is the signing of a contract, what contains a secrecy declaration and regulations concerning to the keeping of special safety measures.

There is a possibility in the program prying the witness and the family members out of the living surroundings, and moving them into our protected flats, or into in a foreign country in the European Union, or in the case of existing visa agreement into the USA or into different countries.

For more information from our Special Services please ask for information on telephone or via email from PSA Headquarters in US or our Centers in Europe, Asia or Africa as well as Regional Representative or Country Director.

Residential and Estate Protection

The Residential and Estate Protection takes protecting your home and family very personally.

There is nothing more important than trusting that your home and family is safe.

The Residential security is no longer a luxury, but essential.

Rely on our specialist team to provide the highest level of protection for your most important possessions - family, home and property.

The PSA International - IBSS™ guarantees that your home stays your safe and secure castle.

Our Residential Security branch provide round-the-clock peace of the mind for a growing number of high-profile, executive, business people and celebrity clients across the London and Sussex area and surrounding region. As with all our services, PSA International - IBSS™ security consultants work with the Client to produce a package tailored to specific requirements.

Our residential security teams, who primarily come from ex-military or ex-police backgrounds, receive detailed assignment specific training. We are very particular about who we have representing our organization and are very selective in our recruitment and screening process.

You will find peace of the mind in knowing that the professional agents at PSA International - IBSS will provide security solutions for you and your loved ones anywhere, all the time.

The PSA-IBSS provides these services within the following special area for customers:

- ⇒ Complete analysis and evaluation of security needs
- ⇒ Customized security solutions specific to clients needs
- ⇒ High tech alarm systems
- ⇒ Surveillance systems

Our Residential Security Services may be claimed individually or as part of a complex personal protection comprehensive plan for any short or long term detail.

Embassy and Consulates Protection

Embassies, Consulates and High Commissions, as the representative offices of Governments overseas, have always required high levels of security, particularly in areas where terrorist cells and disaffected groups may operate.

This is particularly so for Governments with ongoing military operations or for whom activist groups wish to create change by violent means. Successful attacks or damage to an embassy are often seen as a symbolic act against that country.

Attacks on Embassies are a common occurrence often resulting in loss of life such as the American Embassy bombings of Tanzania, Kenya & Yemen, the Australian Embassy bombing in Jakarta and the Embassy sieges in the U.K., Sweden and Colombia, as well as violent demonstrations and attacks on Embassies in the Middle East, all of which demonstrate the international danger to Embassy staff and property

The Embassy protection is a very complex security task which included the diplomatic motorcade, delegations, diplomats, politicians and their family members protection too and other.... - This services of course we doing independently of ethnic view and religious affiliation.

PSA International - IBSS™ offers complete security solutions for embassies worldwide. For several years the PSA-Academy® is the official educational institute of the PSA International - IBSS™ has been in charge of the training of various embassies in Europe and Middle East.

Based on this experience, PSA International - IBSS™ developed its own and unique security system Embassy Protection Consulting System (EPCS). The EPCS is a tool for embassies to make it easier to adjust the daily operation of the embassy in different security levels.

Based on EPCS, PSA International - IBSS™ and it is official educational institute the PSA-Academy® offers teaching and consulting to embassy staff, security personnel, diplomats etc. The course will be based on the embassy's current threat level. Duration of the course vary from some hours to a longer course over time.

Please contact PSA International - IBSS™ for a meet about embassy protection or consulting services.

Music, - Film Awards and VIP Events Security

Security solutions for weddings, conventions, trade shows, fundraising, award events and private parties. PSA International - IBSS™ has provided security for many events including nationally televised fund raisers, award ceremonies, exclusive residential parties and high profile weddings.

Special Event Security Teams are used when there is a need to ensure that High Profile or Controversial Events are properly secured and controlled. These events are run with precision planning and always involve effective liaison with relevant agencies and all involved parties.

Events that have been covered include:

- ⇒ **Corporate Annual General Meetings – Board Meetings – Private Meetings**
- ⇒ **Security of Assets During Corporate takeovers or on behalf of Receivers**
- ⇒ **Media Events- Award Ceremonies - Press Launches – Press Junkets – Press Conferences**
- ⇒ **Exclusive Media controlled events – Weddings – Parties – Product Launches, etc.**
- ⇒ **Protection of Assets when a specified troublesome / risk event is occurring around the location of the assets.**
- ⇒ **Trade Shows - Musical Events – Concerts – Festivals**

We can provide full risk assessment prior to engagement and put in place all the components required for a safe & successful event.

We have taken care of many private functions such as weddings & parties; providing full security services including secure drivers, close personal protection, and key role adoption.

Large events present a challenging situation in which to create a secure environment. PSA-IBSS has many years experience providing event security across a broad range of large venues.

PSA-IBSS has secured many events on-board large luxury yachts and offers very particular expertise in this area. Whether your event is public or private, a VIP or family function, PSA-IBSS guarantee a smooth, hassle-free and above all safe experience.

Our event security personnel are experienced and well-trained. We provide qualified security managers, crowd control officers and medical staff. We can also appoint ticketing and registration personnel, badge checkers, floor managers, ushers and other kinds of staffing your event might need.

Transport and Security Driver Service

Personal safety and security are most at risk when travelling. The most common cause for people being exposed to safety and security risks are ignorance & complacency.

PSA International - IBSS™ appreciates that value is subjective and that your personal or business security is of primary concern. We provide stylish, secure transport for yourself, loved ones, key personnel, documents, and valuables.

When tasked, we conduct pre-planning and preparation prior to any client movement that identifies and mitigates against any threat.

Transport and secure logistics for your visit to the London in and around may include handling itineraries, journey and route planning aided by our local knowledge of key destinations ensures safe havens, hospitals and other important emergency stop points are at hand in case of emergency.

We are also able to cater to international travel requirements.

Our service caters to even the most complex and demanding situations, providing full operational management and support from initial planning through to delivery.

Our drivers undergo intensive instruction, utilizing the latest defensive and anti-terrorist driving techniques for anti car-jacking. We also provide vehicles fitted with armored materials, if required.

As with all our operational staff, drivers receive regular emergency first-aid training, ensuring that assistance is on hand when needed most.

For more information please contact with us to discuss your exact requirements.

Maritime and Anti-Piracy Service

The PSA International - IBSS's Maritime Security and Anti-Piracy Services has the unique ability, with its wealth of knowledge and experience in risk and security, to assess and formulate a diverse range of security solutions and systems, standalone or integrated, to meet client's individual requirements.

The PSA International - IBSS™ provides armed guards to escort ships and protection of your staff when travelling through high risk areas like the Gulf of Aden.

We are capable of placing maritime security teams anywhere in the world within a very short time frame.

Our mission is to provide our clients with professional bespoke maritime security services that will protect their interests from piracy and terrorism.

Using our extensive experience in maritime security, our experts can help you design an affordable package of services that provide you with the best value for your money.

The PSA International - IBSS™ brings together the state of the art technology and a highly professional, certified staff with the depth of knowledge and experience needed to provide and maintain the most advanced and reliable maritime security tailored to the needs of each respective maritime company, shipping line, ship-owner and governments served.

Our maritime security teams have proven operational experience in the use of a variety of defensive and offensive techniques, ranging from hostile environments such as; Iraq, Afghanistan, Yemen, Somalia the Gulf of Aden and Indian Ocean.

In accordance with IMO advice, our preferred approach is to use highly trained onboard security teams, trained in counter-piracy measures.

We use deterrence in our approach when we protect clients in high risk waters; this approach aims to frighten pirates and keeps them away from vessels guarded by PSA International - IBSS™.

We are proud of the breadth of knowledge and experience we offer to our Clients.

High Priority Facilities Protection

A high priority facilities as an Military, - government or critical infrastructures like the different power plants (nuclear, - hydro, etc) and water, oil, gas pipelines, airports etc.

Critical Infrastructure furthermore includes facilities for generating electricity and its distribution, oil & gas distribution, water supplies, agriculture, transport, tunnels, bridges, health provision, financial and security services, among others.

These facilities need to be protected to a very high level at all times, any damage to these services can cause disruption, loss of revenues and loss of life particularly in areas where terrorist cells and disaffected groups may operate.

This is particularly so for Governments with ongoing military operations or for whom activist groups wish to create change by violent means. Successful attacks or damage to an these high priority facilities are often seen as a symbolic act against that country.

Attacks on Critical Infrastructure can take the form of physical attacks to Buildings and people, or electronic attacks, either internally or via internet-facing computer-based networks.

The PSA has a wide portfolio of products and services for the protection of high priority facilities and these facilities staff including solutions for Perimeter Security, - CCTV Surveillance both externally and internally of the buildings, - Access Control & ID systems such as Advanced Door Locks, ID Scanners and Biometric Security; and Entry Control encompassing Turnstiles, Gates, Crash Proof Barriers and Bollards, - X-Ray Baggage Scanners and Walk Through Metal Detectors to detect weapons and explosives, - Leak Detection and Ground Based Radar to prevent unauthorised access and malicious damage, - Intruder Detection systems can also be deployed to detect unauthorised access in secure areas.

Staff can monitor the surroundings of an high priority facilities using our Perimeter Surveillance systems, in which fencing can have fiber optic-based solutions to detect any attempt to cut or climb the fence this would be integrated with the CCTV system to provide verification and tracking of the intruder.

Personnel can be protected with Staff Protection Systems including Staff Attack alarms, Armoured vehicles, and Ballistic & Blast-Proof Doors. In the event of a serious incident, Threat and Evacuation Systems allow staff to be safely removed from the area of danger; a range of Panic and Safe Rooms can be installed to provide protection when evacuation is not possible.

Blast Protection solutions help to protect the structure and occupants of these high priority facilities, whilst Anti-blast Film can protect people and property from flying glass, which is the cause of 90% of injuries from bomb-blasts.

[Continuation on next page](#)

High Priority Facilities Protection

Personal Tracking Systems allow staff to be monitored globally, so that in the event of their being taken hostage or attacked security staff can be alerted to their whereabouts immediately. Training programmes in Hostage and Kidnap Awareness help to minimise the chances of personnel putting themselves in situations where this is likely to happen.

The protection of providing airspace at these high priority facilities is also very important and critical point in the protection. - must be prevented as an a possible intelligence activities or to attack these facilities by drone etc.

Signalling cables running alongside railway lines and power cables are a common target of theft, the result of which could have severe repercussions – the PSA International has solutions available which can be deployed for the protection of such assets.

Water distribution could be a target for terrorist activity and so should be protected accordingly.

In a world where electronic attacks are becoming ever more wide spread and where the information is power and value, the other main protection segment the protection of informations and dates in these high priority facilities as well as the protection of the all communication network. Therefore we can provide a range of solutions for Cable & Network Security to protect valuable systems and computer data from misuse or sabotage.

The physical elements of Critical Infrastructure are often located in remote areas and as a result are particularly at risk from Fire. Fire Detection and Suppression solutions help to protect personnel and property from the dangers associated with the outbreak of fire; whilst Temperature Sensing and Strain Gauge Sensing are used to monitor the environment within critical facilities.

The PSA International Group and it's Defence and Security Research and development Centre to address these problems offer up-to-date defence technologies and security solutions are available for you and your organisation.

Oil and Gas Facilities Guarding

We provide protective security and risk management for oil and gas facilities and pipeline projects around the world.

PSA International - IBSS™ is experienced in providing a safe and secure environment for oil companies to conduct their daily operations. Any oil or gas operation faces risk of emergencies, health problems, criminals and environmental issues, particularly within high risk environments where there is a clear requirement to provide premium grade, integrated security services.

We also provide experienced and highly trained security officers/close protection teams and with advanced technology it ensures the safety of clients at all times, including when traveling to oil and gas sites too.

We protect critical supply chains and crucial national assets by offering a broad range of security solutions to the oil & gas industry around the world.

Camp Security

Employee safety is guaranteed in your camps. Unauthorized personnel are not allowed in them. The security guards have an effective checking system to ensure that alcohol, drugs and other banned items do not enter the camps. Patrols make certain that everything is safe within the camps. Also security guards make sure that any laid down rules are followed.

Pipeline Security

Oil pipelines do face risks from theft, criminal activities and leakage that leads to environmental disasters. Patrol units ensure that your pipelines functions well and any issues are reported immediately. These patrols can be easily tracked through our GPS technology so you are always aware of where the security patrol is.

Risk Assessment and Security Review

PSA International - IBSS™ reviews your security and emergency plans and offers ways you can improve them. Our security expertise lends us a unique perspective that can enhance these plans. Our experts will help develop a plan that meets your ever changing requirements. Additionally, GPS Security Guards on your oil sands site are well aware of your security and emergency plan. This way, they can lend a hand and help execute and deal with various emergencies.

Armed and PSD Services

PSA International - IBSS's department of PSD provides comprehensive protective security services tailored to the high - risk and threat, the operating environment and the specific requirements of its clients. Each protective security concept is undertaken in discussion with the client and is based on a comprehensive analysis of the factors for each mission or deliverable.

A PSA International - IBSS's Special Armed Security Service members of highly qualified ex-soldiers, police officers and law enforcement agents who have real life experienced, who throughout the years obtained much knowledge and personal experiences in the different areas such as Anti-terrorism, convoy protection, Embassy and consulate protection, personal protection and protection of the bases in the War Zones, Terror Areas and in other Specialist Security.

They worked and protected VIPs in Iraq, Afghanistan, Africa as well as other war zones and high risk areas in all of the world.

Mobile Security Team

PSA International - IBSS's mobile security teams provide bespoke security solutions to facilitate ease of movement and successful business activities in a high-risk zone and threat environment.

Each mobile security task differs depending on a number of factors and planning considerations such as the profile of the client, stated aims, resources, locations, threat and budget.

PSA International - IBSS's mobile security teams typically provide dedicated mobile security and liaison with relevant authorities and Ministry officials, airport immigration and local security forces. Our experienced personnel can also provide linguistic support, relevant intelligence and threat analysis, ground study and route analysis for all movements; contingency planning and much more.

High-Risk Environment Close Protection

PSA International - IBSS's close protection team provide to protect our Clients in High-Risk Environment.

Clients include executives and technical experts employed by the world's leading energy, construction, technology, finance and defense companies as well as dignitaries, diplomats and high net worth individuals working in volatile countries.

Convoy protection:

PSA International - IBSS™ can provide security for cargo being transported between locations and general movement management.

We can provide to convoy escort missions, safely delivering high value cargo such as cash, oil & gas, power generation and construction equipment through the world's most high risk remote and urban areas.

Static Security

PSA International - IBSS™ provides high quality and effective static guarding for both Government and Commercial clients. To date we have had no breaches of security at any site.

PSA International - IBSS's approach to static guarding is based upon a comprehensive and ongoing analysis of the threats to the location to be guarded, which will inform the design and implementation of the appropriate security solution.

We provide both manpower and technology to protect personnel, high value property and equipment in a resilient, cost effective and accommodative manner.

We provides protect remote contractor camps, corporate headquarters, government compounds, emergency relief centres, strategic power plants, supply-chain hubs, ports and airports military forward operating bases and other crucial temporary and permanent facilities around the world.

The Static Security Services we provide are informed by comprehensive risk assessments. This ensures the static security solutions implemented are commensurate with thorough and on-going analysis of the risk level faced by the specific facility in the specific environment.

Note:

The all our protective services at, our colleagues can (individually or as part of a security detail) plan, organize, and execute a comprehensive protection plan for any short or long term detail.

Our clients can have confidence in their protection team's ability to handle their protection detail from start to finish.

Security Consulting

PSA International - IBSS™ knows that there is no 'off-the-shelf' solution for your security needs.

Countless options exist for each event. For this reason we regard each one of our security solutions as a unique building block. Only after we finish carefully and proficiently analyzing your security needs and concerns do we recommend the best 'blocks' necessary to build the 'fortress.'

For obvious reasons, only our finest professionals take part in the consulting phase of our service.

These competent professionals will not only recommend the best security solution for your specific and unique needs, but will also adapt the solution to your available budget.

We pride ourselves on being a security agency that displays integrity, professionalism, discretion, and excellence while ensuring our clients' needs are met.

If you have any queries or require any further information, please email:

info@psa-internationalco.com or call for an informal discussion with one of our security consultants on.

SECURITY & DEFENCE TECHNOLOGY RESEARCH AND DEVELOPMENT CENTRE™

It was recently revealed that, thanks to Edward Snowden, our business and private data is considered even less safe than we have thought up until now. Interception of governmental actors, collecting and sharing business information with competitors by specialized state services are everyday occurrence.

Regarding the above mentioned facts we can state that information is power, and modern warfare demands radio frequency technology and communication and also the interference and blocking of the use of these technologies.

It is easy to realize that existence and employment or non-existence of these technologies can be crucial in market competitions or in the battlefield during hostilities and their outcome.

Recognizing this the PSA International established the Security & Defence Technology Research and Development Centers (SDTRDC) that is an integral part and a member of PSA International group and having been given the Military Technology Activity license it produced several tools that provided protection for armed forces serving abroad.

SDTRDC is an independent and private scientific research institute and developing centre that mainly produces and develops the latest version of Information security and as follows military technologies: intelligence, secret radio frequency and communication as well as the jammer and the intelligence drone technologies and these technologies use in the both Military and private security industry as well.

For more information about SDTRDC and our special security and defence technologies as well as our products - please contact us. www.psa-deftech.com info@psa-deftech.com
